SUMMARY

Results-driven Python Developer with strong knowledge of Python, Django, Flask, and Data Science concepts. Skilled in developing scalable web applications, RESTful APIs, backend systems, and data-driven solutions using Python technologies. Hands-on experience in machine learning, API development, database management, testing, and debugging. Passionate about building efficient, high-performance applications with clean architecture and optimized backend logic. Strong problem-solving, analytical thinking, and team collaboration abilities.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript

Frontend Technologies: HTML5, CSS3, React.js, Bootstrap

Frameworks: REST APIs, Flask, Django

Libraries: Pandas, NumPy, Matplotlib, Scikit-learn

Databases: MySQL, Firebase Firestore

Tools & Practices: Git, GitHub, Postman, VS Code, IntelliJ IDEA

Concepts: OOP, Cloud Fundamentals, DSA, SDLC, API Integration, Machine Learning, MVC Architecture, RESTful APIs

PROJECTS

Smart Helpdesk Ticketing Solution for IT Services using AI/ML Jan 2026 – Mar 2026

- Built a scalable role-based ticketing system for Admins, Technicians, and Users, improving issue tracking and resolution efficiency.
- Designed and implemented RESTful APIs using Flask and performed API testing using Postman to ensure reliability and performance.
- Developed and validated test cases for ticket workflows, improving system stability and ensuring smooth handling of 100+ simulated requests.

Green Harvest – Machine Learning Based Fertilizer Optimization Sep 2025 – Dec 2025

- Developed a machine learning-based fertilizer recommendation application using Python, Flask, and RESTful APIs to assist farmers in selecting suitable fertilizers based on soil and crop conditions.
- Built and integrated backend APIs using Flask for processing soil nutrients, crop type, environmental conditions, and fertilizer recommendation workflows.

Expense Tracker Application using Flutter and Firebase Jul 2025 – Sep 2025

- Developed a cross-platform expense tracking mobile application using Flutter and Firebase for efficient personal finance management.
- Implemented real-time data synchronization using Firebase Firestore to ensure consistent and secure data updates across devices.

EDUCATION

SVERI's College of Engineering Autonomous, Pandharpur Sep 2024 – Present

Master of Computer Applications (MCA) - CGPA: 9.21

TRAINING

Python Full Stack Development Training - The Kiran Academy Jan 2025 – May 2025

- Trained in Python, Django, Flask, REST APIs, MySQL, and Data Science fundamentals.
- Developed backend applications and API-driven web solutions using Python technologies and gained hands-on experience in debugging, testing, and building scalable applications using Python frameworks.

CERTIFICATIONS

- Research Paper: Smart Helpdesk Ticketing Solution for IT Services using AI/ML focused on automation, intelligent issue resolution, and system optimization.
- AWS for Beginners – Great Learning

LEADERSHIP

- Event Coordinator – Olympus 2K25: Led and coordinated cross-functional teams, ensuring effective communication between stakeholders and participants. Managed multiple tasks, demonstrating strong time management, leadership, and multitasking abilities.
